SUMMARY

Technical writer and knowledge manager with 5+ years of experience creating documentation for cloud and AI products. At Microsoft, I manage knowledge strategy across a multi-product portfolio, connecting product expertise, RAG retrieval data, and customer needs to prioritize improvements, after leading the 350+ article Azure Kubernetes Service doc set. Known for turning complex technical material into clear, accurate content and for building strong partnerships with product, engineering, and support teams.

EXPERIENCE

MICROSOFT

Knowledge Manager 2 September 2026 – Present

- Own knowledge strategy across a portfolio of 10 services and 10 subservices, establishing accountable product team ownership of content and enabling partners to contribute successfully
- Connect product expertise, content strategy, RAG retrieval data, tooling, and customer needs to prioritize content improvements across the portfolio

Content Developer 2, Azure Kubernetes Service (AKS) June 2024 – August 2026

Content Developer, Azure Kubernetes Service (AKS) July 2022 – June 2024

- Promoted twice in four years for expanding scope and impact
- Led documentation for AKS on Microsoft Learn, a 350+ article doc set for a complex, fast-moving cloud service, owning stakeholder engagement across product, engineering, and customer support teams to plan, prioritize, and deliver content
- Optimized documentation for RAG retrieval and AI-grounded answers, improving retrieval readiness across 51 articles and raising the doc set's Content Quality score by 2.5 points
- Served as an early tester for the org's AI retrievability tool and AI Response Quality pilot; feedback shaped org-wide retrievability priorities
- Used content metrics, customer feedback, and telemetry to continuously prioritize content health and engagement work, contributing to gains such as a 36.7% increase in helpfulness ratings
- Owned the customer feedback loop for AKS docs, resolving 300+ GitHub issues, support bugs, and in-product feedback items in partnership with product and support teams
- Authored the first-ever high availability and disaster recovery guidance for AKS, plus reliability, AWS-to-Azure migration, PCI-DSS v4.0 compliance, GPU, and AI/ML content
- Built collaboration programs with product, engineering, and support partners, including an AKS content council and recurring doc-a-thons, and mentored new hires

AQUENT

Technical Writer (Contract for Microsoft) February 2022 – July 2022

- Wrote and maintained Microsoft Learn documentation for Azure Resource Manager (ARM) templates and Bicep, Azure's infrastructure-as-code tools

EDUCATIVE.IO

Lead Technical Content Marketing Specialist and Blog Lead August 2021 – February 2022

Technical Content Writer April 2021 – August 2021

- Increased sign-up rate by over 200% and organic blog revenue by over 900% as blog lead; grew newsletter subscribers by over 250%
- Designed and implemented the official Educative blog style guide
